Pipeline Inspections. Actionable Intelligence.

When your data is in ITpipes, your data is in Trimble.

FieldVision - Easy Inspections

Expedite inspections and boost performance with FieldVision. This powerful software is compatible with the majority of camera systems on the market and is NASSCO and SPICAP certified.

CoreVision - Dynamic Reporting

CoreVision offers unlimited, drill-down filtering and reporting to quickly display inspection results. As inspections are synced, corresponding assets are color coded and displayed on the included map. Instantly create reports and export to share inspection data with others.

ITpipes Sync – Automated Management

Sync can upload or download data, apply updates, send out automatic notification to users and is fully configurable. Settings allow Sync to run on a pre-defined schedule or on demand, as needed.

ITpipes Cloud – SaaS or Local

Fully hosted, on-demand, and SaaS, ITpipes Cloud securely stores and archives your pipe inspection data and videos for easy access anytime, anywhere. On-premise, local storage or client-hosted cloud storage is also an option with ITpipes applications.

ITpipes & Trimble Inspections when and where you need them.

- **Assigned Work Orders Sync**
  Work orders assigned in Trimble are pre-populated in a to-do list that displays in FieldVision.
- **Complete Inspections Sync**
  Inspections completed in FieldVision are uploaded to CoreVision and Trimble. The upload can include asset detail, asset inspection detail, and observation detail.
- **Emergency and Unplanned Inspections**
  The Esri map in FieldVision can be used to create emergency and unscheduled inspections, live in the field. After completion, ITpipes Sync auto-creates the work order in Trimble and uploads the inspection, ensuring all work is tracked.
- **Rescheduled Work is Reorganized**
  While in the field, inspectors can pull assignments from other staff for completion. ITpipes Sync tracks and finalizes this completion, uploading and adjusting information automatically inside Trimble AMS.
- **Inspection Access for all Trimble Users**
  ITpipes Inspection Viewer can be launched direct from Trimble. This gives comprehensive inspection information access to all Trimble users.
